

Twist Biocomposite

Screw-in Suture Anchors

Twist Biocomposite Screw-In Suture Anchors are recommended for use in both large and small-joint repairs. The proven design of the Twist family has been updated with Parcus Biocomposite material that is comprised of 70% PLGA and 30% B-TCP.

Features & Benefits

Biocomposite Material

- Biocomposite material that promotes bony ingrowth
- Has a proven record of safety and efficacy

Fully-threaded design

- Optimal cortical fixation
- Reduce the risk of "pull-back"

SST (Static Suture Tape) Configuration

- Allows for a reproducible all knotless double-row surgical technique with predictable suture tensioning
